Lucas Froeschner

Full Stack Developer

lucas.froeschner@gmail.com · 319.430.0599 · froesch.dev · github.com/LFroesch

Career-switching network technician turned full stack developer. Hands-on experience building and deploying web applications, Go CLI tools, and cloud infrastructure. Focused on backend systems, developer tooling, and shipping end-to-end.

SKILLS

Languages	Go, TypeScript, JavaScript, Python, SQL, Bash
Frontend	React, Tailwind CSS, Vite
Backend	Node.js, Express, Go (Gin), RESTful APIs, WebSockets
Databases	PostgreSQL, MongoDB, Mongoose, Redis
DevOps	Docker, Docker Compose, nginx, Linux, SSH, DigitalOcean, SSL/TLS, fail2ban
Tools	Git, Stripe, Socket.IO, Cloudinary, Jest

PROJECTS

Dev Codex — 2025

TypeScript, React, Express, MongoDB, Socket.IO, Stripe · dev-codex.com

- Terminal-first project management platform with 200+ REST endpoints and 1,000+ Jest tests
- Built-in AI assistant with multi-turn sessions, SSE streaming, and 70+ slash commands with autocomplete
- Real-time collaboration via Socket.IO — note locking, presence indicators, and activity feeds
- Stripe billing integration, JWT/OAuth authentication, and self-hostable deployment option

Gather — 2025

React, Express, MongoDB, Socket.IO, Cloudinary · gather.froesch.dev

- Location-based social platform with geospatial event discovery using MongoDB $geoNear queries
- Real-time messaging with online/offline presence, friendship-gated DMs, and ~50 API endpoints
- Social feed with follows, community polls, song voting with daily charts, and admin dashboard

Scout — 2025

Go, Bubble Tea, Lip Gloss · live demo on froesch.dev

- TUI file explorer used as a daily driver — built to replace default terminal file navigation
- 4 search modes: directory, recursive, content search via ripgrep integration, and ultra (combined)
- Full file operations with trash-based undo, git-aware UI, and frecency-ranked bookmarks

Vox — 2025

Python, PyQt6, SpeechRecognition, pywin32

- Voice-controlled desktop automation with speech recognition and fuzzy command matching
- Workflow engine for batch-launching apps, terminals, and URLs with multi-monitor layout restore

TECHNICAL EXPERIENCE

Infrastructure & Deployment — froesch.dev — 2026

DigitalOcean, Docker Compose, nginx, Ubuntu

- Provisioned and configured a Linux VPS with nginx reverse proxy, SSL termination, and Docker Compose
- Deployed multiple full-stack apps to production with Docker Compose
- Hardened server security: fail2ban, disabled password auth, firewall rules, unattended upgrades
- Built a live TUI demo server using Go WebSockets and sandboxed containers (bwrap) for in-browser access

TUI Developer Toolkit — 10+ Go CLI Applications 2025 – Present

Go, BubbleTea, Lipgloss, /proc filesystem

- Built and maintain a suite of terminal tools used daily: file explorer, git client, port monitor, script runner, task manager, and project launcher
- Real-time system monitoring reading /proc/stat, /proc/meminfo, and /proc/net/dev for live CPU, memory, and network stats
- Concurrent TUI architecture using Go channels and the Elm architecture pattern

WORK HISTORY

Network Technician — Vista Broadband 2022 – 2024

- Ran independent field routes across distributed wireless infrastructure — installations, alignments, cabling
- Diagnosed connectivity issues across a multi-site wireless network with minimal supervision
- Used CLI tools to monitor network traffic, diagnose connectivity issues, and troubleshoot live connections
- On-call 24/7 for critical infrastructure outages and damage repair

EDUCATION

Boot.dev — Backend Development Certificates 2024 – 2025

Algorithms, data structures, HTTP servers/clients, databases, authentication, API design, concurrency, memory management.
